Fundus Photo Screening (Retinal Photos)

We recommend that all of our patients receive this test as part of their yearly comprehensive eye exam. The cost for this procedure is **\$18.00**, but is not covered (paid) by insurance.

Fundus photos are an extremely valuable and inexpensive tool that assists us in earlier detection of many eye diseases, including glaucoma, cataracts, macular degeneration, diabetes and optic nerve disease. The photos are saved and compared from year to year. Also, if necessary, they can be printed or e-mailed to an eye specialist for their review.

Please indicate below if you agree to receive fundus photos:

YES _____, and agree to pay \$18.00 fee.

NO _____, refuse.
